Abstract (Basic): EP 480848 A

The distributor has a cylindrical body (1) which is fixed to a wall. It contains a circular plate (3) which holds the reel of towels (4) vertically and has a central hole (3.1) through which the towel is pulled. A cylindrical protective case (5) covers the reel and is fixed to the body.

The plate has a chimney (3.2) round its hole which holds the reel and reshapes it. The outer shape of the chimney is cylindrical or conical and its upper edge (3.4) is rounded. It is made in one piece with the body.

USE - For distributing paper towels from the centre of a reel.

Abstract (Equivalent): EP 480848 B

Dispenser of paper towel unwinding from the inside comprising a body (1) which can be fastened to a bearing surface, said body being designed to receive a roll (4), support plate (3), said roll being disposed vertically, said plate having a central opening (3.1) for the pulled paper to pass through, a profiled cover (5) being fitted and positioned removably on the body, characterised in that a chimney-shaped part (3.2) is provided around central opening (3.1) of plate (3) extending upwards inside the roll, the purpose of said chimney being to straighten out the paper which has become twisted and creased during its unwinding from the inside of the roll.
